

Dear Sirs,
Please do not stifle XM Satellite radio. This is a private service that I pay for with my own money. Please do what's American and reject NAB's petition 04-160. Free market competition is what made this country great and it is XM's right via the First Amendment to be able to broadcast as they wish. If the National Association of Broadcasters feel threatened by the product that XM is offering, it is probably because the product is by far superior to what NAB is offering (which I personally believe is the truth). I appreciate you giving me a chance to be heard.

Thank you for your time,
Jason Taack
